

Remote Task & Details

Hacktasyne: The 10-Hour Tech Hackathon

Tech Fusion Fest 2025

Organized by

BASIS Students' Forum of BUBT Chapter Club

The Intra University Hackathon for BUBT students only.

1. Introduction

BASIS Students' Forum of BUBT Chapter Club proudly presents **Hacktasyne: The 10-Hour Tech Hackathon**, one of the key attractions of **Tech Fusion Fest 2025**.

This exciting event brings together the brightest tech minds to innovate, build, and showcase solutions that embody the essence of the **theme**:

“Smart Solutions, Simple Codes”, where innovation meets simplicity.

Hacktasyne challenges participants to solve real-world problems with efficient, elegant, and simple code. It's not about writing more code; it's about writing smarter code that makes an impact.

Teams will go through a pre-hack phase from home and then battle it out in a **10-hour on-site Hackathon** at **BUBT Campus**, under mentorship, creativity, and time pressure.

The hackathon is divided into two phases:

- **Phase 1: Remote Development (40–50%)** – Foundational preparation from home.
- **Phase 2: Onsite Hackathon (50–60%)** – Core development, integration, and presentation at the venue.

Remote Task (Pre-Hackathon)

Objective: Set up your project structure and prepare a base to build upon during the onsite round.

Allowed Tasks:

1. **Make A Project Plan (To do list)**
 - Tick (✓) mark what you are finishing before the **Freezing Time**.
2. **Project initialization (frontend + backend Skeleton).**
3. **Page Setup or UI/UX Prototype.**
4. **Authentication setup (login/signup pages) for login/sign up - if required.**
5. **Documentation for Project (Detailed Project Report).**
 - **Make it perfectly align with your Project & Theme.**
6. **Mock API setup or placeholder data (if applicable).**
7. **Project Presentation Slides.**
8. **Connect your repo to Vercel for deployment tracking.**
9. **A Screenshot of your final commit & deployment that will be checked before starting On-site task.**

Not Allowed:

- Core business logic or main feature development
- Integration of frontend and backend
- Full API implementation or dynamic functionality
- Complex data handling or automation logic

Submission Requirements:

- Push your code to your **GitHub repository**, Commit before **Freezing Time**.
- Connect your repo to **Vercel** for deployment tracking.
 - Live URL will have to be given by the Google Form we will provide later.
- Please ensure your GitHub repository is accessible to the organizers for verification.
- Set Your **Github Repository**(Project Name) to **Private** and share this to our mail basischapter@bubt.edu.bd

Onsite Hackathon

Duration: 8 hours of coding + 2 hours of presentation

Tasks to Complete Onsite:

1. Core feature implementation and business logic
2. API integration and dynamic functionality
3. Database operations and real data handling
4. Testing, debugging, and optimization
5. Final deployment and live demo
6. Presentation to judges
7. Other Required Tasks

Project Tracking & Verification

GitHub Tracking

- All teams must maintain a **GitHub repository**.
- Commit regularly with clear messages.
- The organizing team will verify:
 - Commit timestamps
 - Changes made after the remote phase deadline
 - Code progress and additions during the onsite event

Vercel Deployment Tracking

- Teams using Vercel must ensure it is linked to their GitHub repo.
- Every deployment is automatically time-stamped.
- The commit hash in Vercel must match the GitHub commit used during submissions.

Baseline Snapshot

Before the onsite hackathon:

- Organizers will record your **final remote commit** and **deployment timestamp**.
- You will continue onsite development from that verified baseline only.

Rules & Code of Conduct

- 1. Fair Work Policy:**
 - Only allowed remote tasks should be completed before the onsite round.
 - Any pre-completion of restricted features will result in disqualification.
- 2. Repository Access:**
 - Teams must provide full access to their GitHub repository for review.
- 3. Commit Authenticity:**
 - No commits should be added after the **Freezing Time** and before onsite events start.
- 4. Use of External Code:**
 - Pre-built templates or AI-generated full projects are not allowed.
 - Open-source libraries and tools are permitted if properly credited.
- 5. Presentation Guidelines:**
 - Teams will present their project live after coding.
 - Judges may ask about what was done remotely vs. onsite.
- 6. Team Composition:**
 - One member must be responsible for GitHub commit management.
- 7. Technical Misconduct:**
 - Uploading offline-prepared large code chunks onsite, cloning prebuilt repos, or faking commit times will lead to disqualification.
- 8. Respect & Collaboration:**
 - Maintain professionalism and integrity throughout the event.

Submission Guidelines

- Final submission must include:
 - GitHub repository link
 - Live deployed URL(Vercel)
- Deadline: 17 November, 2025; 11.59 PM
- A Google Forms will be given through mail later. You'll have to fill out the form with documents asked.

On-Site Development & Final Presentation

- Date: **18 November, 2025**
- Duration: **10 Hours Continuous Hackathon**
- Venue: **BUBT Campus**
- Reporting Time: **8:00 AM sharp (with ID cards & essential equipments)**

Tentative Schedule

07:30 AM	Reporting & Setup
08:30 AM – 04:30 PM	Development/Coding Phase,documentation
04:30 PM – 06:30 PM	Presentation & Judging

Technical Notes

- Internet will be provided; backup hotspot recommended.
- Teams must bring their own devices and chargers.
- No-code/low-code tools (e.g., Webflow, Wix) are **not allowed**.
- The use of AI tools is allowed strictly for reference purposes. Participants are required to write their own code, and any breach of this rule will be treated seriously.

Rules & Guidelines

- All development must be original and created during the event period.
- Pre-built templates, reused projects, or plagiarism will cause **disqualification**.
- Open-source libraries and public APIs are allowed.
- No external collaboration or code sharing between teams.
- Teams must meet all deadlines for submissions and presentations.
- Respect mentors, organizers, and peers throughout the event.

Judging & Evaluation Criteria

Criteria	Description	Marks
Relevance to Theme	How well it aligns with “ Smart Solutions, Simple Codes. ”	10
Functionality	Working features, usability, and stability.	20
Code Quality	Simplicity, cleanliness, efficiency, maintainability.	20
Innovation	Creativity and uniqueness of the idea.	10
UI/UX Design	Clean, usability, and user-friendliness.	10
Technical Execution	Efficient logic, scalability, or advanced integration.	10
Teamwork & Time Management	Collaboration, role clarity, and timely delivery.	10
Presentation & Demo	Clarity, confidence, and overall impression.	10
Total		100 Marks

Prize Pool

Award	Prize
🏆 Champion	₳8,000 + Certificate + Trophy
🥈 1st Runner-up	₳5,000+ Certificate + Award
🥉 2nd Runner-up	₳4,000+ Certificate + Award

Key Dates (Tentative)

Activity	Date
Online Registration	27 October -11 November 2025
Remote Task Release	12 November 2025
Remote Submission Deadline	17 November 2025
On-Site Hackathon (Final Round)	18 November 2025

10. Code of Conduct

- All participants must maintain respect, integrity, and professionalism throughout the event.
- Any form of cheating, plagiarism, or misconduct will lead to **immediate disqualification**.
- Organizers reserve full rights to modify, postpone, or cancel the event in case of unforeseen circumstances.
